1.11 SEVERABILITY. If any section, provision, or part of this Code of Ordinances is adjudged invalid or unconstitutional, such adjudication will not affect the validity of this Code of Ordinances as a whole or any section, provision, or part thereof not adjudged invalid or unconstitutional.

CHAPTER 36

HAZARDOUS SUBSTANCE SPILLS

36.01 Purpose

In order to reduce the danger to the public health, safety, and welfare from the leaks and spills of hazardous substances, these regulations are promulgated to establish responsibility for the treatment, removal and cleanup of hazardous substance spills within the City limits.

36.02 Definitions

For purposes of this chapter the following terms are defined:

1. “Cleanup” means actions necessary to contain, collect, control, identify, analyze, clean up, treat, disperse, remove, or dispose of a hazardous substance.
   (Code of Iowa, Sec. 455B.381[1])

2. “Hazardous condition” means any situation involving the actual, imminent, or probable spillage, leakage, or release of a hazardous substance onto the land, into a water of the State, or into the atmosphere which creates an immediate or potential danger to the public health or safety or to the environment.
   (Code of Iowa, Sec. 455B.381[4])

3. “Hazardous substance” means any substance or mixture of substances that presents a danger to the public health or safety and includes, but is not limited to, a substance that is toxic, corrosive, or flammable, or that is an irritant or that generates pressure through decomposition, heat, or other means. “Hazardous substance” may include any hazardous waste identified or listed by the administrator of the United States Environmental Protection Agency under the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976, or any toxic pollutant listed under section 307 of the Federal Water Pollution Control Act as amended to January 1, 1977, or any hazardous substance designated under Section 311 of the Federal Water Pollution Control Act as amended to January 1, 1977, or any hazardous material designated by the Secretary of Transportation under the Hazardous Materials Transportation Act.
   (Code of Iowa, Sec. 455B.381[5])

4. “Responsible person” means a person who at any time produces, handles, stores, uses, transports, refines, or disposes of a hazardous substance, the release of which creates a hazardous condition, including bailees, carriers, and any other person in control of a hazardous substance when a hazardous condition occurs, whether the person owns the hazardous substance or is operating under a lease, contract, or other agreement with the legal owner of the hazardous substance.
   (Code of Iowa, Sec. 455B.381[7])

36.03 Cleanup Required

Whenever a hazardous condition is created by the deposit, injection, dumping, spilling, leaking or placing of a hazardous substance, so that the hazardous substance or a constituent of the hazardous substance may enter the environment or be emitted
into the air or discharged into any waters, including ground waters, the responsible person shall cause the condition to be remedied by a cleanup, as defined in the preceding section, as rapidly as feasible to an acceptable, safe condition. The costs of cleanup shall be borne by the responsible person. If the responsible person does not cause the cleanup to begin in a reasonable time in relation to the hazard and circumstances of the incident, the City may, by an authorized officer, give reasonable notice, based on the character of the hazardous condition, said notice setting a deadline for accomplishing the cleanup and stating that the City will proceed to procure cleanup services and bill the responsible person for all costs associated with the cleanup if the cleanup is not accomplished within the deadline. In the event that it is determined that immediate cleanup is necessary as a result of the present danger to the public health, safety and welfare, then no notice shall be required and the City may proceed to procure the cleanup and bill the responsible person for all costs associated with the cleanup. If the bill for those services is not paid within thirty (30) days, the City Attorney shall proceed to obtain payment by all legal means. If the cost of the cleanup is beyond the capacity of the City to finance it, the authorized officer shall report to the Council and immediately seek any State or Federal funds available for said cleanup.

36.04 LIABILITY FOR CLEANUP COSTS. The responsible person shall be strictly liable to the City for all of the following:

1. The reasonable cleanup costs incurred by the City or the agents of the City as a result of the failure of the responsible person to clean up a hazardous substance involved in a hazardous condition.

2. The reasonable costs incurred by the City or the agents of the City to evacuate people from the area threatened by a hazardous condition caused by the person.

3. The reasonable damages to the City for the injury to, destruction of, or loss of City property, including parks and roads, resulting from a hazardous condition caused by that person, including the costs of assessing the injury, destruction or loss.

4. The excessive and extraordinary cost incurred by the City or the agents of the City in responding at and to the scene of a hazardous condition caused by that person.

36.05 NOTIFICATIONS.

1. A person manufacturing, storing, handling, transporting, or disposing of a hazardous substance shall notify the State Department of Natural Resources and the Police Chief of the occurrence of a hazardous condition as soon as possible but not later than six (6) hours after the onset of the hazardous condition or discovery of the hazardous condition. The Police Chief shall immediately notify the Department of Natural Resources.

2. Any other person who discovers a hazardous condition shall notify the Police Chief, who shall then notify the Department of Natural Resources.

36.06 POLICE AUTHORITY. If the circumstances reasonably so require, the law enforcement officer or an authorized representative may:

1. Evacuate persons from their homes to areas away from the site of a hazardous condition, and

2. Establish perimeters or other boundaries at or near the site of a hazardous condition and limit access to cleanup personnel.

No person shall disobey an order of any law enforcement officer issued under this section.
36.07 LIABILITY. The City shall not be liable to any person for claims of damages, injuries, or losses resulting from any hazardous condition, unless the City is the responsible person as defined in Section 36.02(4).

CHAPTER 46

MINORS

46.01 Curfew

46.02 Cigarettes and Tobacco

46.03 Contributing to Delinquency

46.01 CURFEW. The Council has determined that a curfew for minors is necessary to promote the public health, safety, morals and general welfare of the City and specifically to reinforce the primary authority and responsibility of adults responsible for minors; to protect the public from the illegal acts of minors committed after the curfew hour; and to protect minors from improper influences and criminal activity that prevail in public places after the curfew hour.

1. Definitions. For use in this section, the following terms are defined:

A. “Emergency errand” means, but is not limited to, an errand relating to a fire, a natural disaster, an automobile accident or any other situation requiring immediate action to prevent serious illness, bodily injury, or loss of life.

B. “Knowingly” means knowledge that a responsible adult should reasonably be expected to have concerning the whereabouts of a minor in that responsible adult’s custody. It is intended to continue to hold the neglectful or careless adult responsible for a minor to a reasonable standard of adult responsibility through an objective test. It is therefore no defense that an adult responsible for a minor was completely indifferent to the activities or conduct or whereabouts of the minor.

C. “Minor” means any unemancipated person under the age of eighteen (18) years.

D. “Nonsecured custody” means custody in an unlocked multipurpose area, such as a lobby, office or interrogation room that is not designed, set aside, or used as a secure detention area, and the person arrested is not physically secured during the period of custody in the area; the person is physically accompanied by a law enforcement officer or a person employed by the facility where the person arrested is being held; and the use of the area is limited to providing nonsecured custody only while awaiting transfer to an appropriate juvenile facility or to court, for contacting of and release to the person’s parents or other responsible adult or for other administrative purposes; but not for longer than six (6) hours without the oral or written order of a judge or magistrate authorizing the detention. A judge shall not extend the period of time in excess of six hours beyond the initial six-hour period.

E. “Public place” includes stores, parking lots, parks, playgrounds, streets, alleys, and sidewalks dedicated to public use and also includes such parts of buildings and other premises, whether publicly or privately owned, that are used by the general public or to which the general public is invited commercially for a fee or otherwise; or in or on which the general public is permitted without specific invitation; or to which the general public has
access. For purposes of this section, a vehicle or other conveyance is considered to be a public place when in the areas defined above.

F. "Responsible adult" means a parent, guardian or other adult specifically authorized by law or authorized by a parent or guardian to have custody or control of a minor.

2. Curfew Established. It is unlawful for any minor to be or remain upon any of the alleys, streets or public places or to be in places of business and amusement in the City between the hours of 11:00 p.m. and 6:00 a.m. of the following day on days commencing on Sunday, Monday, Tuesday, Wednesday, and Thursday and between the hours of midnight and 6:00 a.m. on Friday and Saturday.

3. Exceptions. The following are exceptions to the curfew:
   A. The minor is accompanied by a responsible adult.
   B. The minor is on the sidewalk or property where the minor resides or on either side of the place where the minor resides and the adult responsible for the minor has given permission for the minor to be there.
   C. The minor is present at or is traveling between home and one of the following:
      (1) Minor’s place of employment in a business, trade or occupation in which the minor is permitted by law to be engaged or, if traveling, within one hour after the end or before the beginning of work;
      (2) Minor’s place of religious activity or, if traveling, within one hour after the end or before the beginning of the religious activity;
      (3) Governmental or political activity or, if traveling, within one hour after the end or before the beginning of the activity;
      (4) School activity or, if traveling, within one hour after the end or before the beginning of the activity;
      (5) Assembly such as a march, protest, demonstration, sit-in or meeting of an association for the advancement of economic, political, religious or cultural matters, or for any other activity protected by the First Amendment of the U.S. Constitution guarantees of free exercise of religion, freedom of speech, freedom of assembly or, if traveling, within one hour after the end or before the beginning of the activity.
   D. The minor is on an emergency errand for a responsible adult;
   E. The minor is engaged in interstate travel through the City beginning, ending or passing through the City when such travel is by direct route.

4. Responsibility of Adults. It is unlawful for any responsible adult knowingly to permit or to allow a minor to be in any public place in the City within the time periods prohibited by this section unless the minor’s presence falls within one of the above exceptions.

5. Enforcement Procedures.
   A. Determination of Age. In determining the age of the juvenile and in the absence of convincing evidence such as a birth certificate or driver’s
license, a law enforcement officer on the street shall, in the first instance, use his or her best judgment in determining age.

B. Grounds for Arrest; Conditions of Custody. Grounds for arrest are that the person refuses to sign the citation without qualification; persists in violating the ordinance; refuses to provide proper identification or to identify himself or herself; or constitutes an immediate threat to the person’s own safety or to the safety of the public. A law enforcement officer who arrests a minor for a curfew violation may keep the minor in custody either in a shelter care facility or in any nonsecured setting. The officer shall not place bodily restraints, such as handcuffs, on the minor unless the minor physically resists or threatens physical violence when being taken into custody. A minor shall not be placed in detention following a curfew violation.

C. Notification of Responsible Adult. After a minor is taken into custody, the law enforcement officer shall notify the adult responsible for the minor as soon as possible. The minor shall be released to the adult responsible for the minor upon the promise of such person to produce the child in court at such time as the court may direct.

D. Minor Without Adult Supervision. If a law enforcement officer determines that a minor does not have adult supervision because the law enforcement officer cannot locate the minor’s parent, guardian or other person legally responsible for the care of the minor, within a reasonable time, the law enforcement officer shall attempt to place the minor with an adult relative of the minor, an adult person who cares for the child or another adult person who is known to the child.

6. Penalties.

A. Responsible Adult’s First Violation. In the case of a first violation by a minor, the law enforcement officer shall, by certified mail, send to the adult responsible for the minor, written notice of the violation with a warning that any subsequent violation will result in full enforcement of the curfew ordinance against both the responsible adult and minor, with applicable penalties.

B. Responsible Adult’s Second Violation. Any responsible adult as defined in this section who, following receipt of a warning, knowingly allows the minor to violate any of the provisions of this section is guilty of a municipal infraction.

C. Minor’s First Violation. In the case of a first violation by a minor, the law enforcement officer shall give the minor a written warning, which states that any subsequent violation will result in full enforcement of the curfew ordinance against the responsible adult and the minor, with applicable penalties, or, at the law enforcement officer’s discretion, may issue the minor a citation for a first violation.

D. Minor’s Second Violation. For the minor’s second and subsequent violations of any of the provisions of this section, the minor is guilty of a municipal infraction.

46.02 CIGARETTES AND TOBACCO. It is unlawful for any person under eighteen (18) years of age to smoke, use, possess, purchase, or attempt to purchase any tobacco, tobacco
products, alternative nicotine products, vapor products, or cigarettes. Possession of tobacco, tobacco products, alternative nicotine products, vapor products, or cigarettes by a person under eighteen years of age shall not constitute a violation of this section if said person possesses the tobacco, tobacco products, alternative nicotine products, vapor products, or cigarettes as part of the person’s employment and said person is employed by a person who holds a valid permit under Chapter 453A of the Code of Iowa or who lawfully offers for sale or sells cigarettes or tobacco products.

(Code of Iowa, Sec. 453A.2)

(Code of Iowa, Sec. 364.12[3h])

CHAPTER 57

VICIOUS ANIMALS

57.01  DEFINITION.  For use in this chapter, “vicious animal” means any animal that has attacked, bitten or clawed a person while running at large and the attack was unprovoked, or any animal that has exhibited vicious tendencies in present or past conduct, including such that said animal: (i) has bitten more than one person during the animal’s lifetime; or (ii) has bitten one person on two or more occasions during the animal’s lifetime; or (iii) has attacked any domestic animal or fowl without provocation, causing injury or death while off the property of the owner.

57.02  KEEPING OF VICIOUS ANIMALS PROHIBITED.  No person shall keep, shelter or harbor for any reason within the City a vicious animal except in the following circumstances:

1.  Animals under the control of a law enforcement or military agency.

2.  The keeping of guard dogs; however, guard dogs must be kept within a structure or fixed enclosure at all times, and any guard dog found at large may be processed as a vicious animal pursuant to the provisions of this chapter. Any premises guarded by a guard dog shall be prominently posted with a sign containing the wording “Guard Dog,” “Vicious Dog” or words of similar import, and the owner of such premises shall inform the Mayor or peace officer that a guard dog is on duty at said premises.

57.03  SEIZURE, IMPOUNDMENT AND DISPOSITION.

1.  In the event that a vicious animal is found at large and unattended upon public property, park property, public right-of-way or the property of someone other than its owner, thereby creating a hazard to persons or property, such animal may, in the discretion of the Mayor or peace officer, be destroyed if it cannot be confined or captured. The City shall be under no duty to attempt the confinement or capture of a vicious animal found at large, nor shall it have a duty to notify the owner of such animal prior to its destruction.

2.  Upon the complaint of any individual that a person is keeping, sheltering or harboring a vicious animal on premises in the City, the Mayor or peace officer shall cause the matter to be investigated; and if after investigation, the facts indicate that the person named in the complaint is keeping, sheltering or harboring a vicious animal in the City, the Mayor or peace officer shall order the person named in the complaint to safely remove such animal from the City or destroy the animal within three (3) days of the receipt of such an order. Such order shall be contained in a notice to remove the vicious animal, which notice shall be given in writing to the person keeping, sheltering or harboring the vicious animal, and shall be served personally or by certified mail. Such order and notice to remove the vicious animal shall not be required where such animal has previously caused serious physical harm or death to any person, in which case the Mayor or peace officer shall cause the animal to be
immediately seized and impounded or killed if seizure and impoundment are not possible without risk of serious physical harm or death to any person.

3. The order to remove a vicious animal issued by the Mayor or peace officer may be appealed to the Council. In order to appeal such order, written notice of appeal must be filed with the Clerk within three (3) days after receipt of the order contained in the notice to remove the vicious animal. Failure to file such written notice of appeal shall constitute a waiver of the right to appeal the order of the Mayor or peace officer.

4. The notice of appeal shall state the grounds for such appeal and shall be delivered personally or by certified mail to the Clerk. The hearing of such appeal shall be scheduled within seven (7) days of the receipt of the notice of appeal. The hearing may be continued for good cause. After such hearing, the Council may affirm or reverse the order of the Mayor or peace officer. Such determination shall be contained in a written decision and shall be filed with the Clerk within three (3) days after the hearing or any continued session thereof.

5. If the Council affirms the action of the Mayor or peace officer, the Council shall order in its written decision that the person owning, sheltering, harboring or keeping such vicious animal remove such animal from the City or destroy it. The decision and order shall immediately be served upon the person against whom rendered in the same manner as the notice of removal. If the original order of the Mayor or peace officer is not appealed and is not complied with within three (3) days or the order of the Council after appeal is not complied with within three (3) days of its issuance, the Mayor or peace officer is authorized to seize, impound or destroy such vicious animal. Failure to comply with an order of the Mayor or peace officer issued pursuant to this chapter and not appealed, or of the Council after appeal, constitutes a simple misdemeanor.

4. “Police authority” means the Iowa state patrol or any law enforcement agency of a county or city.

80.02 Authority to Take Possession of Abandoned Vehicles. A police authority, upon the authority’s own initiative or upon the request of any other authority having the duties of control of highways or traffic, shall take into custody an abandoned vehicle on public property and may take into custody any abandoned vehicle on private property. The police authority may employ its own personnel, equipment, and facilities or
hire a private entity, equipment, and facilities for the purpose of removing, preserving, storing, or disposing of abandoned vehicles. A property owner or other person in control of private property may employ a private entity that is a garage keeper to dispose of an abandoned vehicle, and the private entity may take into custody the abandoned vehicle without a police authority’s initiative. If a police authority employs a private entity to dispose of abandoned vehicles, the police authority shall provide the private entity with the names and addresses of the registered owners, all lienholders of record, and any other known claimant to the vehicle or the personal property found in the vehicle.

(Code of Iowa, Sec. 321.89[2])

80.03 NOTICE BY MAIL. The police authority or private entity that takes into custody an abandoned vehicle shall notify, within twenty (20) days, by certified mail, the last known registered owner of the vehicle, all lienholders of record, and any other known claimant to the vehicle or to personal property found in the vehicle, addressed to the parties’ last known addresses of record, that the abandoned vehicle has been taken into custody. Notice shall be deemed given when mailed. The notice shall describe the year, make, model and vehicle identification number of the vehicle, describe the personal property found in the vehicle, set forth the location of the facility where the vehicle is being held, and inform the persons receiving the notice of their right to reclaim the vehicle and personal property within ten (10) days after the effective date of the notice upon payment of all towing, preservation, and storage charges resulting from placing the vehicle in custody and upon payment of the costs of the notice. The notice shall also state that the failure of the owner, lienholders or claimants to exercise their right to reclaim the vehicle or personal property within the time provided shall be deemed a waiver by the owner, lienholders and claimants of all right, title, claim and interest in the vehicle or personal property and that failure to reclaim the vehicle or personal property is deemed consent to the sale of the vehicle at a public auction or disposal of the vehicle to a demolisher and to disposal of the personal property by sale or destruction. If the abandoned vehicle was taken into custody by a private entity without a police authority’s initiative, the notice shall state that the private entity may claim a garage keeper’s lien as described in Section 321.90 of the Code of Iowa, and may proceed to sell or dispose of the vehicle. If the persons receiving notice do not ask for a hearing or exercise their right to reclaim the vehicle or personal property within the ten-day reclaiming period, the owner, lienholders or claimants shall no longer have any right, title, claim, or interest in or to the vehicle or the personal property. A court in any case in law or equity shall not recognize any right, title, claim, or interest of the owner, lienholders or claimants after the expiration of the ten-day reclaiming period.

(Code of Iowa, Sec. 321.89[3a])

80.04 NOTIFICATION IN NEWSPAPER. The published notice may contain multiple listings of abandoned vehicles and personal property but shall be published within the same time requirements and contain the same information as prescribed for mailed notice in Section 80.03.

(Code of Iowa, Sec. 321.89[3b])
80.05 FEES FOR IMPOUNDMENT. The owner, lienholder, or claimant shall pay all towing and storage fees as established by the storage facility, whereupon the vehicle shall be released.

(Code of Iowa, Sec. 321.89[3a])

80.06 DISPOSAL OF ABANDONED VEHICLES. If an abandoned vehicle has not been reclaimed as provided herein, the police authority or private entity shall make a determination as to whether or not the motor vehicle should be sold for use upon the highways, and shall dispose of the motor vehicle in accordance with State law.

(Code of Iowa, Sec. 321.89[4])

The City or any person upon whose property or in whose possession is found any abandoned motor vehicle, or any person being the owner of a motor vehicle whose title certificate is faulty, lost or destroyed, may dispose of such motor vehicle to a demolisher for junk, without a title and without notification procedures, if such motor vehicle lacks an engine or two or more wheels or other structural part which renders the vehicle totally inoperable. The police authority shall give the applicant a certificate of authority. The applicant shall then apply to the County Treasurer for a junking certificate and shall surrender the certificate of authority in lieu of the certificate of title.

(Code of Iowa, Sec. 321.90[2e])

80.08 PROCEEDS FROM SALES. Proceeds from the sale of any abandoned vehicle shall be applied to the expense of auction, cost of towing, preserving, storing, and notification required, in accordance with State law. Any balance shall be held for the owner of the motor vehicle or entitled lienholder for ninety (90) days, and then shall be deposited in the State Road Use Tax Fund. Where the sale of any vehicle fails to realize the amount necessary to meet costs the police authority shall apply for reimbursement from the Department of Transportation.

(Code of Iowa, Sec. 321.89[4])

80.09 DUTIES OF DEMOLISHER. Any demolisher who purchases or otherwise acquires an abandoned motor vehicle for junk shall junk, scrap, wreck, dismantle, or otherwise demolish such motor vehicle. 1. “Combined service account” means a customer service account for the provision of two or more utility services.
2. “Customer” means, in addition to any person receiving water service from the City, the owner of the property served, and as between such parties the duties, responsibilities, liabilities and obligations hereinafter imposed shall be joint and several.
3. “Superintendent” means the Public Works Director of the City or any duly authorized assistant, agent or representative.

5. “Water service pipe” means the pipe from the water main to the building served.
6. “Water system” or “water works” means all public facilities for securing, collecting, storing, pumping, treating, and distributing water.

90.02  SUPERINTENDENT’S DUTIES. The Superintendent shall supervise the installation of water service pipes and their connection to the water main and enforce all regulations pertaining to water services in the City in accordance with this chapter. This chapter shall apply to all replacements of existing water service pipes as well as to new ones. The Superintendent shall make such rules, not in conflict with the provisions of this chapter, as may be needed for the detailed operation of the water system, subject to the approval of the Council. In the event of an emergency the Superintendent may make temporary rules for the protection of the system until due consideration by the Council may be had.

(Code of Iowa, Sec. 372.13[4])

90.03  MANDATORY CONNECTIONS. All residences and business establishments within the City limits intended or used for human habitation, occupancy or use shall be connected to the public water system, if it is reasonably available and if the building is not furnished with pure and wholesome water from some other source.
90.04 ABANDONED CONNECTIONS. When an existing water service is abandoned or
a service is renewed with a new tap in the main, all abandoned connections with the mains
shall be turned off at the corporation stop and made absolutely watertight.

90.05 PERMIT. Before any person makes a connection with the public water system, a
written permit must be obtained from the City. The application for the permit shall include a
legal description of the property, the name of the property owner, the name and address of the
person who will do the work, and the general uses of the water. If the proposed work meets
all the requirements of this chapter and if all fees required under this chapter have been paid,
the permit shall be issued. Work under any permit must begin within six (6) months after the
permit is issued, except that when such time period is inequitable or unfair due to conditions
beyond the control of the person making the application, an extension of time within which to
complete the work may be granted. The permit may be revoked at any time for any violation
of these chapters.

90.06 FEE FOR PERMIT. Before any permit is issued the person who makes the
application shall pay fifty dollars ($50.00) to the Clerk to cover the cost of issuing the permit
and supervising, regulating, and inspecting the work.

(Code of Iowa, Sec. 384.84)

90.07 COMPLIANCE WITH PLUMBING CODE. The installation of any water service
pipe and any connection with the water system shall comply with all pertinent and applicable
provisions, whether regulatory, procedural or enforcement provisions, of the State Plumbing
Code.

90.08 PLUMBER REQUIRED. All installations of water service pipes and connections to
the water system shall be made by a State-licensed plumber.

90.09 EXCAVATIONS. All trench work, excavation, and backfilling required in making a
connection shall be performed in accordance with the provisions of the State Plumbing Code
and the provisions of Chapter 135 of this Code of Ordinances.

90.10 TAPPING MAINS. All taps into water mains shall be made by or under the direct
supervision of the Superintendent and in accord with the following:

(Code of Iowa, Sec. 372.13[4])

1. Independent Services. No more than one house, building, or premises shall be
supplied from one tap unless special written permission is obtained from the
Superintendent and unless provision is made so that each house, building, or premises
may be shut off independently of the other.

2. Sizes and Location of Taps. All mains six (6) inches or less in diameter shall
receive no larger than a ¾-inch tap. All mains of over six inches in diameter shall
receive no larger than a one-inch tap. Where a larger connection than a one-inch tap
is desired, two or more small taps or saddles shall be used, as the Superintendent shall
order. All taps in the mains shall be made in the top half of the pipe, at least eighteen
(18) inches apart. No main shall be tapped nearer than two (2) feet of the joint in the
main.

3. Corporation Stop. A brass corporation stop, of the pattern and weight
approved by the Superintendent, shall be inserted in every tap in the main. The
corporation stop in the main shall be of the same size as the service pipe.
4. **Location Record.** An accurate and dimensional sketch showing the exact location of the tap shall be filed with the Superintendent in such form as the Superintendent shall require.

**90.11 INSTALLATION OF WATER SERVICE PIPE.** Water service pipes from the main to the meter setting shall be Type K copper or plastic pipe with tracer wire in accordance with Section 90.20. The use of any other pipe material for the service line shall first be approved by the Superintendent. Pipe must be laid sufficiently waving, and to such depth, as to prevent rupture from settlement or freezing.

**90.12 RESPONSIBILITY FOR WATER SERVICE PIPE.** All costs and expenses incident to the installation, connection, and maintenance of the water service pipe from the curb valve to the building served shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation or maintenance of said water service pipe.

**90.13 FAILURE TO MAINTAIN.** When any portion of the water service pipe which is the responsibility of the property owner becomes defective or creates a nuisance and the owner fails to correct such nuisance, the City may do so and assess the costs thereof to the property.

*(Code of Iowa, Sec. 364.12[3a & h]*)

**90.14 CURB VALVE.** There shall be installed within the public right-of-way a main shut-off valve on the water service pipe of a pattern approved by the Superintendent. The shut-off valve shall be constructed to be visible and even with the pavement or ground.

**90.15 INTERIOR VALVE.** There shall be installed a shut-off valve on every service pipe inside the building as close to the entrance of the pipe within the building as possible and so located that the water can be shut off conveniently. Where one service pipe supplies more than one customer within the building, there shall be separate valves for each such customer so that service may be shut off for one without interfering with service to the others.

**90.16 INSPECTION AND APPROVAL.** All water service pipes and their connections to the water system must be inspected and approved in writing by the Superintendent before they are covered, and the Superintendent shall keep a record of such approvals. If the Superintendent refuses to approve the work, the plumber or property owner must proceed immediately to correct the work. Every person who uses or intends to use the municipal water system shall permit the Superintendent to enter the premises to inspect or make necessary alterations or repairs at all reasonable hours and on proof of authority.

*(Code of Iowa, Sec. 364.12[3a & h]*)

**90.17 COMPLETION BY THE CITY.** Should any excavation be left open or only partly refilled for twenty-four (24) hours after the water service pipe is installed and connected with the water system, or should the work be improperly done, the City shall have the right to finish or correct the work, and the Council shall assess the costs to the property owner or the plumber. If the plumber is assessed, the plumber must pay the costs before receiving another permit. If the property owner is assessed, such assessment may be collected with and in the same manner as general property taxes.

*(Code of Iowa, Sec. 364.12[3a & h]*)

**90.18 SHUTTING OFF WATER SUPPLY.** The Superintendent may shut off the supply of water to any customer because of any violation of the regulations contained in these Water
Service System chapters that is not being contested in good faith. The supply shall not be turned on again until all violations have been corrected and the Superintendent has ordered the water to be turned on.

90.19 OPERATION OF CURB VALVE AND HYDRANTS. It is unlawful for any person except the Superintendent to turn water on at the curb valve, and no person, unless specifically authorized by the City, shall open or attempt to draw water from any fire hydrant for any purpose whatsoever.

90.20 PLASTIC PIPES WITH TRACER WIRES.

1. Plastic pipe and fittings manufactured and installed in compliance with the State Plumbing Code shall be permitted to be used to construct potable cold water supply systems and water distributing pipe extending underground from the water system owned and operated by the City to the first control valve within a structure. Such plastic pipe may also be used underground outside any structure for cold water purposes, including distribution to any structure for cold water purposes, including distribution of potable water in parks and other recreational areas, and sprinkler systems serving lawns, golf courses, and similar installations.

2. Tracer wires shall be installed for the location of such service. The wires shall be installed adjacent to or within six (6) inches of the service lines, starting at the water meter and continuing along the pipe to the curb box, where it will be placed alongside and brought to the top, terminating in a six-inch loop. The wire shall be covered copper not less than Number 12 in size. Additionally, any and all plastic pipe extending beyond the curb box must also have installed similar tracer wires.
CHAPTER 91
WATER METERS

91.01 Purpose. The purpose of this chapter is to encourage the conservation of water and facilitate the equitable distribution of charges for water service among customers.

91.02 Water Use Metered. All water furnished customers shall be measured through meters purchased from the City and installed by a licensed plumber.

91.03 Fire Sprinkler Systems; Exception. Fire sprinkler systems may be connected to water mains by direct connection without meters under the direct supervision of the Superintendent. No other open, unmetered connection shall be incorporated in the system, and there shall be no valves except a main control valve at the entrance to the building which must be sealed open.

91.04 Location of Meters. All meters shall be so located that they are easily accessible to meter readers and repairmen and protected from freezing.

91.05 Meter Setting. The property owner shall provide all necessary piping and fittings for proper setting of the meter including a valve on the discharge side of the meter. Meter pits may be used only upon approval of the Superintendent and shall be of a design and construction approved by the Superintendent.

91.06 Meter Costs. The City’s cost of the water meter and the radio read/MXU unit shall be paid to the City by the property owner or customer prior to the installation of the meter, or, at the sole option of the City, the property owner or customer may be required to purchase and install such meter in accordance with requirements established by the City.

91.07 Meter Repairs. Whenever a water meter owned by the City is found to be out of order the Superintendent shall have it repaired. If it is found that damage to the meter has occurred due to the carelessness or negligence of the customer or property owner, or the meter is not owned by the City, then the property owner shall be liable for the cost of repairs.

91.08 Right of Entry. The Superintendent shall be permitted to enter the premises of any customer at any reasonable time to read, remove, or change a meter.

91.09 Separate Meter for Outside Watering. A customer may add a second water meter for the purpose of measuring water to be used from outside faucets and for outside watering that is not disposed of through the public sanitary sewer system. The meter must be installed where it measures only the water on outside faucets on the premises being served and the location of such meter must be approved by the Superintendent. The meter and radio read/MXU unit must be purchased from the City and installed by a licensed plumber. No sewer service charge will be assessed to water usage through the outside watering meter.
91.10 METER ACCURACY AND TEST; COMPULSORY TESTS. All water shall be supplied through meters that accurately measure the amount of water supplied to any building. The Superintendent shall make a test of the accuracy of any water meter at any time when requested in writing. If it is found that such meter overruns to the extent of two percent (2%) or more, the cost of the test shall be paid by the City and a refund shall be made to the customer for overcharges collected since the last known date of accuracy, but not for longer than ten (10) years. If the meter is found to be accurate or slow or less than 2% fast, the customer shall pay the reasonable cost of the test. Every meter shall be removed from service at least once every 10 years and thoroughly tested for accuracy. Any meter found inaccurate beyond a tolerance of 2% shall not be returned to service until properly adjusted.
CHAPTER 92

WATER RATES

92.01 SERVICE CHARGES. Each customer shall pay for water service provided by the City based upon use of water as determined by meters provided for in Chapter 91. Each location, building, premises or connection shall be considered a separate and distinct customer whether owned or controlled by the same person or not.

(Code of Iowa, Sec. 384.84)

92.02 RATES FOR SERVICE. Water service shall be furnished at the following rates within the City:

92.03 RATES OUTSIDE THE CITY. Water service shall be provided to any customer located outside the corporate limits of the City which the City has agreed to serve at the same rates provided in Section 92.02. If the customer is a tenant and requests a change of name for service under the account, such request shall be sent to the owner or landlord of the property if the owner or landlord has made a written request for notice of any change of name for service under the account to the rental property.

3. Hearing. If a hearing is requested by noon of the day preceding the shut off, the Clerk shall conduct an informal hearing and shall make a determination as to whether the disconnection is justified. The customer has the right to appeal the Clerk’s decision to the Council, and if the Council finds that disconnection is justified, then such disconnection shall be made, unless payment has been received.

4. Fees. A fee of $26.50 shall be charged before service is restored to a delinquent customer. No fee shall be charged for the usual or customary trips in the regular changes in occupancies of property.

92.06 LIEN FOR NONPAYMENT. The owner of the premises served and any lessee or tenant thereof shall be jointly and severally liable for water service charges to the premises. (Code of Iowa, Sec. 384.84)

92.07 LIEN EXEMPTION.

(Code of Iowa, Sec. 384.84)

1. Water Service Exemption. The lien for nonpayment shall not apply to charges for water service to a residential or commercial rental property where water service is separately metered and the rates or charges for the water service are paid directly to the City by the tenant, if the landlord gives written notice to the City that the property is residential or commercial rental property and that the tenant is liable for the rates or charges. The City may require a deposit not exceeding the usual cost of ninety (90) days of such services to be paid to the City. When the tenant moves from the rental property, the City shall refund the deposit if all service charges are paid in full. The lien exemption does not apply to delinquent charges for repairs related to any of the services.

2. Other Service Exemption. The lien for nonpayment shall also not apply to the charges for any of the services of sewer systems, storm water drainage systems, sewage treatment, solid waste collection, and solid waste disposal for a residential rental property where the charge is paid directly to the City by the tenant, if the
landlord gives written notice to the City that the property is residential rental property and that the tenant is liable for the rates or charges for such service. The City may require a deposit not exceeding the usual cost of ninety (90) days of such services to be paid to the City. When the tenant moves from the rental property, the City shall refund the deposit if all service charges are paid in full. The lien exemption does not apply to delinquent charges for repairs related to any of the services.

3. **Written Notice.** The landlord’s written notice shall contain the name of the tenant responsible for charges, the address of the residential or commercial rental property that the tenant is to occupy, and the date that the occupancy begins. Upon receipt, the City shall acknowledge the notice and deposit. A change in tenant for a residential rental property shall require a new written notice to be given to the City within thirty (30) business days of the change in tenant. A change in tenant for a commercial rental property shall require a new written notice to be given to the City within ten (10) business days of the change in tenant. A change in the ownership of the residential rental property shall require written notice of such change to be given to the City within thirty (30) business days of the completion of the change of ownership. **92.08 LIEN NOTICE.** A lien for delinquent water service charges shall not be certified to the County Treasurer unless prior written notice of intent to certify a lien is given to the customer in whose name the delinquent charges were incurred. If the customer is a tenant and if the owner or landlord of the property or premises has made a written request for notice, the notice shall also be given to the owner or landlord. The notice shall be sent to the appropriate persons by ordinary mail not less than thirty (30) days prior to certification of the lien to the County Treasurer.

*Code of Iowa, Sec. 384.84*

*Code of Iowa, Sec. 384.84*

**92.10 TEMPORARY VACANCY.** A property owner may request water service be temporarily discontinued and shut off at the curb valve when the property is expected to be vacant for an extended period of time. No fee shall be charged for this service. The City will not drain pipes or pull meters for temporary vacancies. During a period when service is temporarily discontinued as provided herein there shall be no minimum water or sewer service charge and no solid waste collection fee.

95.08 **USE OF EASEMENTS.** The Superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all private properties through which the City holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

95.09 **SPECIAL PENALTIES.** The following special penalty provisions shall apply to violations of these Sanitary Sewer chapters:

1. **Notice of Violation.** Any person found to be violating any provision of these chapters except subsections 1, 3, and 4 of Section 95.04, shall be served by the City with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

2. **Continuing Violations.** Any person who shall continue any violation beyond the time limit provided for in subsection 1 hereof shall be in violation of this Code of Ordinances. Each day in which any such violation shall continue shall be deemed a separate offense.

3. **Liability Imposed.** Any person violating any of the provisions of these chapters shall become liable to the City for any expense, loss, or damage occasioned the City by reason of such violation.
CHAPTER 96
BUILDING SEWERS AND CONNECTIONS

96.01 Permit. No unauthorized person shall uncover, make any connection with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the City. The application for the permit shall set forth the location and description of the property to be connected with the sewer system and the purpose for which the sewer is to be used, and shall be supplemented by any plans, specifications, or other information considered pertinent. The permit shall require the owner to complete construction and connection of the building sewer to the public sewer within sixty (60) days after the issuance of the permit, except that when a property owner makes sufficient showing that due to conditions beyond the owner’s control or peculiar hardship, such time period is inequitable or unfair, an extension of time within which to comply with the provisions herein may be granted. Any sewer connection permit may be revoked at any time for a violation of these chapters.

96.02 Permit Fee. There are two (2) classes of building sewer permits, one for residential and commercial service and one for service to establishments producing industrial wastes. The person who makes the application shall pay a fee to the Clerk, in the amount of fifty dollars ($50.00) for a residential/commercial permit and one hundred dollars ($100.00) for an industrial permit, to cover the cost of issuing the permit and supervising, regulating, and inspecting the work.

96.03 Plumber Required. All installations of building sewers and connections to the public sewer shall be made by a State-licensed plumber.

96.04 Connection Requirements.  

1. The installation of the building sewer and its connection to the public sewer shall conform to the requirements of the State Plumbing Code, the laws of the State and other applicable rules and regulations of the City.

2. Plastic pipe and fittings manufactured and installed in compliance with the State Plumbing Code shall be permitted to be used to construct building drain, water and vent systems, including private sewer lines. Tracer wires shall be installed for the location of such plastic pipes. The wires shall be installed adjacent to or within six inches of the plastic pipe, starting at the structure and continuing along the full length of the plastic pipe, where it shall be brought to the top, terminating in a six-inch loop. The wire shall be covered copper not less than Number 12 in size.

96.05 Sewer Tap. Connection of the building sewer into the public sewer shall be made at the “Y” branch, if such branch is available at a suitable location. If no properly located “Y” branch is available, a saddle “Y” shall be installed at the location specified by the
Superintendent. The public sewer shall be tapped with a tapping machine and a saddle appropriate to the type of public sewer shall be glued or attached with a gasket and stainless steel clamps to the sewer. At no time shall a building sewer be constructed so as to enter a manhole unless special written permission is received from the Superintendent and in accordance with the Superintendent’s direction if such connection is approved.

96.06 EXCAVATIONS. All trench work, excavation and backfilling required in making a connection shall be performed in accordance with the provisions of the State Plumbing Code and the provisions of Chapter 135 of this Code of Ordinances.

96.07 INSPECTION REQUIRED. No building sewer shall be covered, concealed or put into use until it has been tested, inspected and accepted as prescribed in the State Plumbing Code.

96.08 PROPERTY OWNER’S RESPONSIBILITY. All costs and expenses incident to the installation, connection and maintenance of the building sewer shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

96.09 ABATEMENT OF VIOLATIONS. Building sewers, whether located upon the private property of any owner or in the public right-of-way, which are constructed or maintained in violation of any of the requirements of this chapter shall be deemed a nuisance and the same shall be abated by the City in the manner provided for the abatement of nuisances.

(Code of Iowa, Sec. 364.12[3])
CHAPTER 97
USE OF PUBLIC SEWERS

97.01 STORM WATER. No person shall discharge or cause to be discharged any storm water, surface water, groundwater, roof run-off, sub-surface drainage, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer. Storm water and all other unpolluted drainage shall be discharged to such sewers that are specifically designated as combined sewers or storm sewers or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process waters may be discharged on approval of the Superintendent, to a storm sewer, combined sewer, or natural outlet.

97.02 SURFACE WATERS EXCEPTION. Special permits for discharging surface waters to a public sanitary sewer may be issued by the Council upon recommendation of the Superintendent where such discharge is deemed necessary or advisable for purposes of flushing, but any permit so issued shall be subject to revocation at any time when deemed to the best interests of the sewer system.

97.03 PROHIBITED DISCHARGES. No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

1. Flammable or Explosive Material. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.

2. Toxic or Poisonous Materials. Any waters or wastes containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to cyanides in excess of two (2) milligrams per liter as CN in the wastes as discharged to the public sewer.

3. Corrosive Wastes. Any waters or wastes having a pH lower than 5.5 or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.

4. Solid or Viscous Substances. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

5. Excessive B.O.D., Solids or Flow.
   A. Any waters or wastes: (i) having a five-day biochemical oxygen demand greater than 300 parts per million by weight; or (ii) containing more...
CHAPTER 97  USE OF PUBLIC SEWERS

than 350 parts per million by weight of suspended solids; or (iii) having an average daily flow greater than two percent of the average sewage flow of the City, shall be subject to the review of the Superintendent.

B. Where necessary in the opinion of the Superintendent, the owner shall provide, at the owner’s expense, such preliminary treatment as may be necessary to: (i) reduce the biochemical oxygen demand to 300 parts per million by weight; or (ii) reduce the suspended solids to 350 parts per million by weight; or (iii) control the quantities and rates of discharge of such waters or wastes. Plans, specifications, and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the Superintendent and no construction of such facilities shall be commenced until said approvals are obtained in writing.

97.04 RESTRICTED DISCHARGES. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming an opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances restricted are:

1. **High Temperature.** Any liquid or vapor having a temperature higher than one hundred fifty degrees (150º) F (65º C).

2. **Fat, Oil, Grease.** Any water or waste containing fats, wax, grease or oils, whether emulsified or not, in excess of 100 milligrams per liter or 600 milligrams per liter of dispersed or other soluble matter.

3. **Viscous Substances.** Water or wastes containing substances that may solidify or become viscous at temperatures between 32º F and 150º F (0º to 65º C).

4. **Garbage.** Any garbage that has not been properly shredded, that is, to such a degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half (½) inch in any dimension.

5. **Acids.** Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solution whether neutralized or not.

6. **Toxic or Objectionable Wastes.** Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.

7. **Odor or Taste.** Any waters or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits that may be established by the Superintendent as necessary, after treatment of the composite sewage, to meet the requirements of State, Federal, or other public agencies of jurisdiction for such discharge to the receiving waters.
8. Radioactive Wastes. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.

10. Unusual Wastes. Materials that exert or cause:
   A. Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).
   B. Excessive discoloration (such as, but not limited to dye wastes and vegetable tanning solutions).
   C. Unusual B.O.D., chemical oxygen demand or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.
   D. Unusual volume of flow or concentration of wastes constituting “slugs” as defined herein.

11. Noxious or Malodorous Gases. Any noxious or malodorous gas or other substance that, either singly or by interaction with other wastes, is capable of creating a public nuisance or hazard to life or of preventing entry into sewers for their maintenance and repair.

12. Damaging Substances. Any waters, wastes, materials, or substances that react with water or wastes in the sewer system to release noxious gases, develop color of undesirable intensity, form suspended solids in objectionable concentration or create any other condition deleterious to structures and treatment processes.

13. Untreatable Wastes. Waters or wastes containing substances that are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

97.05 RESTRICTED DISCHARGES; POWERS OF SUPERINTENDENT. If any waters or wastes are discharged or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Section 97.04 and which in the judgment of the Superintendent may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

1. Rejection. Reject the wastes by requiring disconnection from the public sewage system;
2. Pretreatment. Require pretreatment to an acceptable condition for discharge to the public sewers;
3. Controls Imposed. Require control over the quantities and rates of discharge; and/or
4. Special Charges. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of Chapter 99.
97.06 SPECIAL FACILITIES. If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Superintendent and subject to the requirements of all applicable codes, ordinances, and laws. Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at the owner’s expense.

97.07 CONTROL MANHOLES. When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be installed by the owner at the owner’s expense, and shall be maintained by the owner so as to be safe and accessible at all times.

97.08 TESTING OF WASTES. All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this chapter shall be determined in accordance with the latest edition of Standard Methods for the Examination of Water and Wastewater, published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a 24-hour composite of all outfalls of a premises is appropriate or whether a grab sample or samples should be taken. Normally, but not always, B.O.D. and suspended solids analyses are obtained from 24-hour composites of all outfalls whereas pH’s are determined from periodic grab samples).
CHAPTER 98
ON-SITE WASTEWATER SYSTEMS

98.01 WHEN PROHIBITED. Except as otherwise provided in this chapter, it is unlawful to construct or maintain any on-site wastewater treatment and disposal system or other facility intended or used for the disposal of sewage.

(Code of Iowa, Sec. 364.12[3f])

98.02 WHEN REQUIRED. When a public sanitary sewer is not available under the provisions of Section 95.05, every building wherein persons reside, congregate or are employed shall be provided with an approved on-site wastewater treatment and disposal system complying with the provisions of this chapter.

(IAC, 567-69.1[3])

98.03 COMPLIANCE WITH REGULATIONS. The type, capacity, location, and layout of a private on-site wastewater treatment and disposal system shall comply with the specifications and requirements set forth by the Iowa Administrative Code 567, Chapter 69, and with such additional requirements as are prescribed by the regulations of the County Board of Health.

(IAC, 567-69.1[3 & 4])

98.04 PERMIT REQUIRED. No person shall install or alter an on-site wastewater treatment and disposal system without first obtaining a permit from the County Board of Health.

98.05 DISCHARGE RESTRICTIONS. It is unlawful to discharge any wastewater from an on-site wastewater treatment and disposal system (except under an NPDES permit) to any ditch, stream, pond, lake, natural or artificial waterway, drain tile or to the surface of the ground.

(IAC, 567-69.1[3])

98.06 MAINTENANCE OF SYSTEM. The owner of an on-site wastewater treatment and disposal system shall operate and maintain the system in a sanitary manner at all times and at no expense to the City.

98.07 SYSTEMS ABANDONED. At such time as a public sewer becomes available to a property served by an on-site wastewater treatment and disposal system, as provided in Section 95.05, a direct connection shall be made to the public sewer in compliance with these Sanitary Sewer chapters and the on-site wastewater treatment and disposal system shall be abandoned and filled with suitable material.

(Code of Iowa, Sec. 364.12[3f])
98.08 DISPOSAL OF SEPTAGE. No person shall dispose of septage from an on-site treatment system at any location except an approved disposal site.
CHAPTER 99

SEWER SERVICE CHARGES

99.01 Sewer Service Charges Required. Each customer shall pay sewer service charges for the use of and for the service supplied by the municipal sanitary sewer system based upon the amount of water consumed as follows:

(Code of Iowa, Sec. 384.84)

1. First 1,000 gallons or lesser amount per month @ $23.00 (minimum bill).
2. All over 1,000 gallons per month @ $3.00 per 1,000 gallons.

99.02 Special Rates. Where, in the judgment of the Superintendent and the Council, special conditions exist to the extent that the application of the sewer charges provided in Section 99.01 would be inequitable or unfair to either the City or the customer, a special rate shall be proposed by the Superintendent and submitted to the Council for approval by resolution.

(Code of Iowa, Sec. 384.84)

99.03 Private Water Systems. Customers whose premises are served by a private water system shall pay sewer charges based upon the water used as determined by the City either by an estimate agreed to by the customer or by metering the water system at the customer’s expense. Any negotiated or agreed-upon sales or charges shall be subject to approval of the Council.

(Code of Iowa, Sec. 384.84)

99.04 Payment of Bills. All sewer service charges are due and payable under the same terms and conditions provided for payment of a combined service account as contained in Section 92.04 of this Code of Ordinances. Sewer service may be discontinued in accordance with the provisions contained in Section 92.05 if the combined service account becomes delinquent, and the provisions contained in Section 92.08 relating to lien notices shall also apply in the event of a delinquent account.

99.05 Lien for Nonpayment. Except as provided for in Section 92.07 of this Code of Ordinances, the owner of the premises served and any lessee or tenant thereof shall be jointly and severally liable for sewer service charges to the premises. Sewer service charges remaining unpaid and delinquent shall constitute a lien upon the premises served and shall be certified by the Clerk to the County Treasurer for collection in the same manner as property taxes.

(Code of Iowa, Sec. 384.84)

99.06 Special Agreements Permitted. No statement in these chapters shall be construed as preventing a special agreement, arrangement, or contract between the Council, and any industrial concern whereby an industrial waste of unusual strength or character may be accepted subject to special conditions, rate, and cost as established by the Council.
CHAPTER 105

special handling and that must be disposed of in such a manner as to conserve the environment and protect the public health and safety.

(IAC, 567-100.2)
(IAC, 567-102.13[2] and 400-27.14[2])

105.10 WASTE STORAGE CONTAINERS. Every person owning, managing, operating, leasing, or renting any premises, dwelling unit or any place where refuse accumulates shall provide and at all times maintain in good order and repair portable containers for refuse in accordance with the following:

1. Container Specifications. Waste storage containers shall comply with the following specifications:
   
   A. Residential. Residential solid waste containers shall be provided by the collector or comply with the collector’s requirements.
   
   B. Commercial. Every person owning, managing, operating, leasing or renting any commercial premises where an excessive amount of refuse accumulates and where its storage in portable containers is impractical, shall maintain metal bulk storage containers approved by the City.

2. Storage of Containers. Residential solid waste containers shall be stored upon the residential premises. Commercial solid waste containers shall be stored upon private property, unless the owner has been granted written permission from the City to use public property for such purposes. The storage site shall be well drained and fully accessible to collection equipment, public health personnel, and fire inspection personnel. 122.12 HEARING. The Clerk shall conduct a hearing at which both the licensee and any complainants shall be present to determine the truth of the facts alleged in the complaint and notice. Should the licensee, or authorized representative, fail to appear without good cause, the Clerk may proceed to a determination of the complaint.

122.14 APPEAL. If the Clerk revokes or refuses to issue a license, the Clerk shall make a part of the record the reasons for such revocation or refusal. The licensee, or the applicant, shall have a right to a hearing before the Council at its next regular meeting. The Council may reverse, modify, or affirm the decision of the Clerk by a majority vote of the Council members present and the Clerk shall carry out the decision of the Council.

2. Abutting Property. The proposed vacation will not deny owners of property abutting on the street or alley reasonable access to their property.

137.05  DISPOSAL OF VACATED STREETS OR ALLEYS. When in the judgment of the Council it would be in the best interest of the City to dispose of a vacated street or alley, portion thereof or public ground, the Council may do so in accordance with the provisions of Section 364.7, Code of Iowa.

(Code of Iowa, Sec. 364.7)

137.06  DISPOSAL BY GIFT LIMITED. The City may not dispose of real property by gift except to a governmental body for a public purpose or to a fair.

All new buildings constructed within the City, with excavation below the surrounding grade, which contain floor drains that discharge into the sanitary sewer system shall be equipped with a tiling system or drain field. Such tiling system or drain field shall drain into a sump pit equipped to discharge the water collecting therein so as to prevent the same from entering the sanitary sewer system of the City.

155.12 VIOLATION. It is unlawful for any person to erect, construct, enlarge, alter, repair, or remove, improve, move, convert or demolish, equip, use, occupy, or maintain any building or structure in the City, or cause the same to be done, contrary to or in violation of the provisions of this chapter.

CHAPTER 160

FLOODPLAIN MANAGEMENT

160.01 Statutory Authority, Findings of Fact and Purpose
1. The Legislature of the State of Iowa has in Chapter 414, Code of Iowa, as amended, delegated the power to cities to enact zoning regulations to secure safety from flood and to promote health and the general welfare.

2. Findings of Fact.
   A. The flood hazard areas of the City of Sloan are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base all of which adversely affect the public health, safety and general welfare of the community.
   B. These flood losses, hazards, and related adverse effects are caused by: (i) the occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding; and (ii) the cumulative effect of obstructions on the floodplain causing increases in flood heights and velocities.

3. Statement of Purpose. It is the purpose of this chapter to protect and preserve the rights, privileges and property of the City of Sloan and its residents and to preserve and improve the peace, safety, health, welfare, and comfort and convenience of its residents by minimizing those flood losses described in Section 160.01(2)(A) of this chapter with provisions designed to:
   A. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities.
   B. Require that uses vulnerable to floods, including public facilities which serve such uses, be protected against flood damage at the time of initial construction or substantial improvement.
   C. Protect individuals from buying lands which may not be suited for intended purposes because of flood hazard.
   D. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.
160.02 DEFINITIONS. Unless specifically defined below, words or phrases used in this chapter shall be interpreted so as to give them the meaning they have in common usage and to give this chapter its most reasonable application.

1. “Base flood” means the flood having a one percent chance of being equaled or exceeded in any given year. (See “100-year flood.”)

2. “Basement” means any enclosed area of a building which has its floor or lowest level below ground level (subgrade) on all sides. (Also see “lowest floor.”)

3. “Development” means any manmade change to improved or unimproved real estate, including but not limited to building or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations. “Development” does not include “minor projects” or “routine maintenance of existing buildings and facilities,” as defined in this section. It also does not include gardening, plowing, and similar practices that do not involve filling, grading.

4. “Existing construction” means any structure for which the “start of construction” commenced before the effective date of the first floodplain management regulations adopted by the community.

5. “Existing factory-built home park or subdivision” means a factory-built home park or subdivision for which the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before the effective date of the first floodplain management regulations adopted by the community.

6. “Expansion of existing factory-built home park or subdivision” means the preparation of additional sites by the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

7. “Factory-built home” means any structure, designed for residential use which is wholly or in substantial part, made, fabricated, formed or assembled in manufacturing facilities for installation or assembly and installation, on a building site. For the purpose of this chapter factory-built homes include mobile homes, manufactured homes and modular homes and also include recreational vehicles which are placed on a site for greater than 180 consecutive days and not fully licensed for and ready for highway use.

8. “Factory-built home park” means a parcel or contiguous parcels of land divided into two or more factory-built home lots for sale or lease.

9. “Flood” means a general and temporary condition of partial or complete inundation of normally dry land areas resulting from the overflow of streams or rivers or from the unusual and rapid runoff of surface waters from any source.

10. “Flood elevation” means the elevation floodwaters would reach at a particular site during the occurrence of a specific flood. For instance, the 100-year flood elevation is the elevation of flood waters related to the occurrence of the 100-year flood.

11. “Flood Insurance Rate Map (FIRM)” means the official map prepared as part of (but published separately from) the Flood Insurance Study which delineates both the flood hazard areas and the risk premium zones applicable to the community.
12. “Floodplain” means any land area susceptible to being inundated by water as a result of a flood.

13. “Floodplain management” means an overall program of corrective and preventive measures for reducing flood damages and promoting the wise use of floodplains, including but not limited to emergency preparedness plans, flood control works, flood proofing, and floodplain management regulations.

14. “Flood proofing” means any combination of structural and nonstructural additions, changes, or adjustments to structures, including utility and sanitary facilities, which will reduce or eliminate flood damage to such structures.

15. “Floodway” means the channel of a river or stream and those portions of the floodplains adjoining the channel, which are reasonably required to carry and discharge floodwaters or flood flows so that confinement of flood flows to the floodway area will not cumulatively increase the water surface elevation of the base flood by more than one foot.

16. “Floodway fringe” means those portions of the floodplain, other than the floodway, which can be filled, leveed, or otherwise obstructed without causing substantially higher flood levels or flow velocities.

17. “Historic structure” means any structure that is:
   A. Listed individually in the National Register of Historic Places, maintained by the Department of Interior, or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing of the National Register;
   B. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
   C. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or
   D. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either by: (i) an approved State program as determined by the Secretary of the Interior; or (ii) directly by the Secretary of the Interior in states without approved programs.

18. “Lowest floor” means the floor of the lowest enclosed area in a building including a basement except when all the following criteria are met:
   A. The enclosed area is designed to flood to equalize hydrostatic pressure during floods with walls or openings that satisfy the provisions of Section 160.05(4)(A) of this chapter; and
   B. The enclosed area is unfinished (not carpeted, dry-walled, etc.) and used solely for low damage potential uses such as building access, parking or storage; and
   C. Machinery and service facilities (e.g., hot water heater, furnace, electrical service) contained in the enclosed area are located at least one foot above the 100-year flood level; and
D. The enclosed area is not a basement, as defined in this section.

In cases where the lowest enclosed area satisfies criteria A, B, C and D above, the lowest floor is the floor of the next highest enclosed area that does not satisfy the criteria above.

19. “Minor projects” means small development activities (except for filling, grading and excavating) valued at less than $500.00.

20. “New construction” (new buildings, factory-built home parks) means those structures or development for which the start of construction commenced on or after the effective date of the first floodplain management regulations adopted by the community.

21. New factory-built home park or subdivision” means a factory-built home park or subdivision for which the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of the floodplain management regulations adopted by the community.

22. “100-year flood” means a flood, the magnitude of which has a one percent chance of being equaled or exceeded in any given year or which, on the average, will be equaled or exceeded at least once every 100 years.

23. “Recreational vehicle” means a vehicle which is:
   A. Built on a single chassis;
   B. Four hundred (400) square feet or less when measured at the largest horizontal projection;
   C. Designed to be self-propelled or permanently towable by a light duty truck; and
   D. Designed primarily not for use as a permanent dwelling but as a temporary living quarters for recreational, camping, travel, or seasonal use.

24. “Routine maintenance of existing buildings and facilities” means repairs necessary to keep a structure in a safe and habitable condition that do not trigger a building permit, provided they are not associated with a general improvement of the structure or repair of a damage structure. Such repairs include:
   A. Normal maintenance of structures such as re-roofing, replacing roofing tiles and replacing siding;
   B. Exterior and interior painting, papering, tiling, carpeting, cabinets, counter tops and similar finish work;
   C. Basement sealing;
   D. Repairing or replacing damaged or broken window panes;
   E. Repairing plumbing systems, electrical systems, heating or air conditioning systems and repairing wells or septic systems.

25. “Special flood hazard area” means the land within a community subject to the “100-year flood.” This land is identified as Zone A on the community’s Flood Insurance Rate Map.
26. “Start of construction” includes substantial improvement, and means the date the development permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement, was within 180 days of the permit date. The actual start means either the first placement or permanent construction of a structure on a site, such as pouring of a slab or footings, the installation of pile, the construction of columns, or any work beyond the stage of excavation; or the placement of a factory-built home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of the building, whether or not that alteration affects the external dimensions of the building.

27. “Structure” means anything constructed or erected on the ground or attached to the ground, including (but not limited to) buildings, factories, sheds, cabins, factory-built homes, storage tanks, and other similar uses.

28. “Substantial damage” means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damage condition would equal or exceed 50 percent of the market value of the structure before the damage occurred. Substantial damage also means flood-related damages sustained by a structure on two separate occasions during a 10-year period for which the cost of repairs at the time of such flood event, on the average, equals or exceeds 25 percent of the market value of the structure before the damage occurred.

29. “Substantial improvement” means any improvement to a structure which satisfies either of the following criteria:

   A. Any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure either: (i) before the start of construction of the improvement; or (ii) if the structure has been substantially damaged and is being restored, before the damage occurred. The term does not, however, include any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions. The term also does not include any alteration of a historic structure, provided the alteration will not preclude the structure’s designation as a historic structure.

   B. Any addition which increases the original floor area of a building by 25 percent or more. All additions constructed after the first floodplain management regulations adopted by the community shall be added to any proposed addition in determining whether the total increase in original floor space would exceed 25 percent.

30. “Variance” means a grant of relief by a community from the terms of the floodplain management regulations.

31. “Violation” means the failure of a structure or other development to be fully compliant with the community’s floodplain management regulations.
CHAPTER 160  FLOODPLAIN MANAGEMENT

160.03 GENERAL PROVISIONS.

1. Lands to Which Chapter Apply. The provisions of this chapter shall apply to all lands within the jurisdiction of the City which are located within the boundaries of the Floodplain (Overlay) District as established in Section 160.04.

2. Rules for Interpretation of Floodplain (Overlay) District. The boundaries of the Floodplain (Overlay) District areas shall be determined by scaling distances on the Official Flood Insurance Rate Map. When an interpretation is needed as to the exact location of a boundary, the Mayor shall make the necessary interpretation. The City Council shall hear and decide appeals when it is alleged that there is an error in any requirement, decision, or determination made by the Mayor in the enforcement or administration of this chapter.

3. Compliance. No structure or land shall hereafter be used and no structure shall be located, extended, converted, or structurally altered without full compliance with the terms of this chapter and other applicable regulations which apply to uses within the jurisdiction of this chapter.

4. Abrogation and Greater Restrictions. It is not intended by this chapter to repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. However, where this chapter imposes greater restrictions, the provision of this chapter shall prevail. All other ordinances inconsistent with this chapter are hereby repealed to the extent of the inconsistency only.

5. Interpretation. In their interpretation and application, the provisions of this chapter shall be held to be minimum requirements and shall be liberally construed in favor of the Council and shall not be deemed a limitation or repeal of any other powers granted by State statutes.

6. Warning and Disclaimer of Liability. The standards required by this chapter are considered reasonable for regulatory purposes. This chapter does not imply that areas outside the designated Floodplain (Overlay) District areas will be free from flooding or flood damages. This chapter shall not create liability on the part of the City or any officer or employee thereof for any flood damages that from reliance on this chapter or any administrative decision lawfully made thereunder.

7. Severability. If any section, clause, provision or portion of this chapter is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this chapter shall not be affected thereby.

160.04 ESTABLISHMENT OF FLOODPLAIN (OVERLAY) DISTRICT. The areas within the jurisdiction of the City of Sloan having special flood hazards are hereby designated as a Floodplain (Overlay) District and shall be subject to the standards of the Floodplain (Overlay) District as well as those for the underlying zoning district. The Floodplain (Overlay) District boundaries shall be as shown on the Flood Insurance Rate Map (FIRM) for Woodbury County and Incorporated Areas, City of Sloan, Panel 19193C0575D, dated September 29, 2011.

160.05 STANDARDS FOR FLOODPLAIN (OVERLAY) DISTRICT. All uses must be consistent with the need to minimize flood damage and meet the following applicable performance standards. Where 100-year flood data have not been provided on the Flood Insurance Rate Map, the Iowa Department of Natural Resources shall be contacted to compute such data. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.
1. All Development. All development within the Floodplain (Overlay) District shall:
   A. Be consistent with the need to minimize flood damage.
   B. Use construction methods and practices that will minimize flood damage.
   C. Use construction materials and utility equipment that are resistant to flood damage.
   D. Obtain all other necessary permits from federal, state and local governmental agencies including approval when required from the Iowa Department of Natural Resources.

2. Residential Buildings. All new or substantially improved residential structures shall have the lowest floor, including basement, elevated a minimum of one foot above the 100-year flood level. Construction shall be upon compacted fill which shall, at all points, be no lower than one foot above the 100-year flood level and extend at such elevation at least 18 feet beyond the limits of any structure erected thereon. Alternate methods of elevating (such as piers) may be allowed subject to favorable consideration by the Board of Adjustment, where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding. All new residential structures shall be provided with a means of access which will be passable by wheeled vehicles during the 100-year flood.

3. Nonresidential Buildings. All new or substantially improved non-residential buildings shall have the lowest floor (including basement) elevated a minimum of one foot above the 100-year flood level, or together with attendant utility and sanitary systems, be flood proofed to such a level. When flood proofing is utilized, a professional engineer registered in the State of Iowa shall certify that the flood proofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the 100-year flood; and that the structure, below the 100-year flood level is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum 1988) to which any structures are flood proofed shall be maintained by the Administrator.

4. All New and Substantially Improved Structures.
   A. Fully enclosed areas below the lowest floor (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or meet or exceed the following minimum criteria:
      (1) A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.
      (2) The bottom of all openings shall be no higher than one foot above grade.
(3) Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of floodwaters. Such areas shall be used solely for parking of vehicles, building access and low damage potential storage.

B. New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.

C. New and substantially improved structures must be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

5. Factory-Built homes:

A. All factory-built homes, including those placed in existing factory-built home parks or subdivisions shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one foot above the 100-year flood level.

B. All factory-built homes, including those placed in existing factory-built home parks or subdivisions shall be anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors.

6. Utility and Sanitary Systems:

A. On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.

B. All new and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of floodwaters into the system as well as the discharge of effluent into floodwaters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one foot above the 100-year flood elevation.

C. New or replacement water supply systems shall be designed to minimize or eliminate infiltration of floodwaters into the system. Water supply treatment facilities (other than on-site systems) shall be provided with a level of protection equal to or greater than one foot above the 100-year flood elevation.

D. Utilities such as gas or electrical systems shall be located and constructed to minimize or eliminate flood damage to the system and the risk associated with such flood damaged or impaired systems.

7. Storage of Materials and Equipment. Storage of equipment and materials that are flammable, explosive or injurious to human, animal, or plant life is prohibited unless elevated a minimum of one foot above the 100-year flood level. Other material and equipment must either be similarly elevated or: (i) not subject to major flood
damage and anchored to prevent movement due to floodwaters; or (ii) readily removable from the area within the time available after flood warning.

8. Structural Works. Flood control structural works such as levees, flood walls, etc. shall provide, at a minimum, protection from a 100-year flood with a minimum of three feet of design freeboard and shall provide for adequate interior drainage. In addition, structural flood control works shall be approved by the Department of Natural Resources.

9. Watercourses. Watercourse alterations or relocations must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, such alterations or relocations must be approved by the Department of Natural Resources.

10. Subdivisions. Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installation of public utilities) shall meet the applicable performance standards of this chapter. Subdivision proposals intended for residential use shall provide all lots with a means of access which will be passable by wheeled vehicles during the 100-year flood. Proposals for subdivisions greater than five acres or 50 lots (whichever is less) shall include 100-year flood elevation data for those areas located within the Floodplain (Overlay) District.

11. Accessory Structures.

A. Detached garages, sheds, and similar structures accessory to a residential use are exempt from the 100-year flood elevation requirements where the following criteria are satisfied.

   (1) The structure shall not be used for human habitation.
   (2) The structure shall be designed to have low flood damage potential.
   (3) The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.
   (4) The structure shall be firmly anchored to prevent flotation which may result in damage to other structures.
   (5) The structure’s service facilities such as electrical and heating equipment shall be elevated or flood proofed to at least one foot above the 100-year flood level.

B. Exemption from the 100-year flood elevation requirements for such a structure may result in increased premium rates for flood insurance coverage of the structure and its contents.

12. Recreational Vehicles.

A. Recreational vehicles are exempt from the requirements of subsection 5 of this section regarding anchoring and elevation of factory-built homes when the following criteria are satisfied.

   (1) The recreational vehicle shall be located on the site for less than 180 consecutive days; and
The recreational vehicle must be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system and is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.

B. Recreational vehicles that are located on the site for more than 180 consecutive days or are not ready for highway use must satisfy requirements of subsection 5 of this section regarding anchoring and elevation of factory-built homes.

13. Pipeline Crossings. Pipeline river and stream crossings shall be buried in the streambed and banks, or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering.

160.06 ADMINISTRATION.

1. Appointment, Duties and Responsibilities of Zoning Administrator.

A. The Mayor is hereby appointed to implement and administer the provisions of this chapter and will herein be referred to as the Administrator.

B. Duties of the Administrator include, but are not necessarily limited to the following:

(1) Review all floodplain development permit applications to assure that the provisions of this chapter will be satisfied.

(2) Review floodplain development applications to assure that all necessary permits have been obtained from federal, state and local governmental agencies including approval when required from the Department of Natural Resources for floodplain construction.

(3) Record and maintain a record of the elevation (in relation to North American Vertical Datum 1988) of the lowest floor (including basement) of all new or substantially improved structures in the Floodplain (Overlay) District.

(4) Record and maintain a record of the elevation (in relation to North American Vertical Datum 1988) to which all new or substantially improved structures have been flood proofed.

(5) Notify adjacent communities/counties and the Department of Natural Resources prior to any proposed alteration or relocation of a watercourse and submit evidence of such notifications to the Federal Emergency Management Agency.

(6) Keep a record of all permits, appeals, and such other transactions and correspondence pertaining to the administration of this chapter.

2. Floodplain Development Permit.

A. Permit Required. A Floodplain Development Permit issued by the Administrator shall be secured prior to any floodplain development (any man-made change to improved and unimproved real estate, including but not limited to buildings or other structures, mining, filling, grading, paving,
excavation or drilling operations), including the placement of factory-built homes.

B. Application for Permit. Application shall be made on forms furnished by the Administrator and shall include the following:

1. Description of the work to be covered by the permit for which application is to be made.
2. Description of the land on which the proposed work is to be done (i.e., lot, block, track, street address or similar description) that will readily identify and locate the work to be done.
3. Indication of the use or occupancy for which the proposed work is intended.
4. Elevation of the 100-year flood.
5. Elevation (in relation to North American Vertical Datum 1988) of the lowest floor (including basement) of buildings or of the level to which a building is to be flood proofed.
6. For buildings being improved or rebuilt, the estimated cost of improvements and market value of the building prior to the improvements.
7. Such other information as the Administrator deems reasonably necessary (e.g., drawings or a site plan) for the purpose of this chapter.

C. Action on Permit Application. The Administrator shall, within a reasonable time, make a determination as to whether the proposed floodplain development meets the applicable standards of this chapter and shall approve or disapprove the application. For disapprovals, the applicant shall be informed, in writing, of the specific reasons therefor. The Administrator shall not issue permits for variances except as directed by the City Board of Adjustment.

D. Construction and Use to Be as Provided in Application and Plans. Floodplain Development Permits based on the basis of approved plans and applications authorize only the use, arrangement, and construction set forth in such approved plans and applications and no other use, arrangement or construction. Any use, arrangement, or construction at variance with that authorized shall be deemed a violation of this chapter. The applicant shall be required to submit certification by a professional engineer or land surveyor, as appropriate, registered in the State of Iowa, that the finished fill, building floor elevations, flood proofing, or other flood protection measures were accomplished in compliance with the provisions of this chapter, prior to the use or occupancy of any structure.

A. The City Board of Adjustment may authorize upon request in specific cases such variances from the terms of this chapter that will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the provisions of this chapter will result in unnecessary hardship. Variances granted must meet the following applicable standards.
(1) Variances shall only be granted upon: (i) a showing of good and sufficient cause; (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant; and (iii) a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes or ordinances.

(2) Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(3) In cases where the variance involves a lower level of flood protection for buildings than what is ordinarily required by this chapter, the applicant shall be notified in writing over the signature of the Administrator that: (i) the issuance of a variance will result in increased premium rates for flood insurance up to amounts as high as $25.00 for $100.00 of insurance coverage; and (ii) such construction increases risks to life and property.

B. Factors Upon Which the Decision of the Board of Adjustment Shall Be Based. In passing upon applications for variances, the Board shall consider all relevant factors specified in other sections of this chapter and:

   (1) The danger to life and property due to increased flood heights or velocities caused by encroachments.

   (2) The danger that materials may be swept on to other land or downstream to the injury of others.

   (3) The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.

   (4) The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.

   (5) The importance of the services provided by the proposed facility to the City.

   (6) The requirements of the facility for a floodplain location.

   (7) The availability of alternative locations not subject to flooding for the proposed use.

   (8) The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.

   (9) The relationship of the proposed use to the comprehensive plan and floodplain management program for the area.

   (10) The safety of access to the property in times of flood for ordinary and emergency vehicles.

   (11) The expected heights, velocity, duration, rate of rise and sediment transport of the floodwater expected at the site.
(12) The cost of providing governmental services during and after flood conditions, including maintenance and repair of public utilities (sewer, gas, electrical and water systems), facilities, streets and bridges.

(13) Such other factors which are relevant to the purpose of this chapter.

C. Conditions Attached to Variances. Upon consideration of the factors listed above, the Board of Adjustment may attach such conditions to the granting of variances as it deems necessary to further the purpose of this chapter. Such conditions may include, but not necessarily be limited to:

(1) Modification of waste disposal and water supply facilities.

(2) Limitation of periods of use and operation.

(3) Imposition of operational controls, sureties, and deed restrictions.

(4) Requirements for construction of channel modifications, dikes, levees and other protective measures, provided such are approved by the Department of Natural Resources and are deemed the only practical alternative to achieving the purpose of this chapter.

(5) Flood proofing measures.

160.07 NONCONFORMING USES.

1. A structure or the use of a structure or premises which was lawful before the passage or amendment of this chapter, but which is not in conformity with the provisions of this chapter, may be continued subject to the following conditions:

A. If such use is discontinued for six (6) consecutive months, any future use of the building premises shall conform to this chapter.

B. Uses or adjuncts thereof that are or become nuisances shall not be entitled to continue as nonconforming uses.

2. If any nonconforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than 50 percent of the market value of the structure before the damage occurred, unless it is reconstructed in conformity with the provisions of this chapter. This limitation does not include the cost of any alteration to comply with existing state or local health, sanitary, building or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places, provided that the alteration shall not preclude its continued designation.

160.08 PENALTIES FOR VIOLATION. Violations of the provisions of this chapter or failure to comply with any of the requirements shall constitute a misdemeanor. Any person who violates this chapter or fails to comply with any of its requirements shall upon conviction thereof be fined not more than $500.00 or imprisoned for not more than thirty (30) days. Nothing herein contained prevents the City of Sloan from taking such other lawful action as is necessary to prevent or remedy violation.

160.09 AMENDMENTS. The regulations and standards set forth in this chapter may from time to time be amended, supplemented, changed, or repealed. No amendment, supplement,
change, or modification shall be undertaken without prior approval of the Department of Natural Resources.

CHAPTER 170

SUBDIVISION REGULATIONS

170.01  SHORT TITLE.  This chapter shall be known and may be cited as “The City of Sloan, Iowa, Subdivision Control Ordinance.”

170.02  PURPOSE.  The purpose of this chapter is to provide minimum standards for the design, development, and improvement of all new subdivisions and resubdivisions of land, so that existing developments will be protected, and so that adequate provisions are made for public facilities and services, and so that growth occurs in an orderly manner, consistent with the Comprehensive Plan, and to promote the public health, safety, and general welfare of the citizens of the City.

(Code of Iowa, Sec. 354.1 and 364.1)

170.03  APPLICATION.  Every owner who divides original parcels of land, forty (40) acres or part thereof, entered of record in the office of the County Recorder as a single lot, parcel or tract on or before the effective date of these regulations (March, 1997) into three or more lots, parcels, or tracts for the purpose, whether immediate or future, of laying out an addition, subdivision, building lot or lots, acreage or suburban lots, transfer of ownership or building development within the City shall cause plats of such area to be made in the form, and containing the information, as hereinafter set forth, before selling any lots therein contained or placing the plat on record.

(Code of Iowa, Sec. 354.9)

170.04  RECORDING OF PLAT.  No subdivision plat, resubdivision plat or street dedication within the City, or as recorded in the office of the County Recorder and filed with the County Auditor, as provided in Section 354.9, Code of Iowa, shall be filed for record with the County Recorder, or recorded by the County Recorder, until a final plat of such subdivision, resubdivision, or street dedication has been reviewed and approved in accordance with the provisions of this chapter.  Upon the approval of the final plat by the Council, it shall be the duty of the subdivider to immediately file such plat with the County Auditor and County Recorder, as required by law.  Such approval shall be revocable after thirty (30) days, unless such plat has been duly recorded and evidence thereof filed with the City Clerk within such 30 days.

(Code of Iowa, Sec. 354.9)

170.06 IMPROVEMENTS REQUIRED. The subdivider shall, at said subdivider’s expense, install and construct all improvements required by this chapter. All required improvements shall be installed and constructed in accordance with the design standards established for such improvements by the City, and as shown on the approved preliminary plat.

170.07 INSPECTION. All improvements shall be inspected to insure compliance with the requirements of this chapter. The cost of such inspection shall be borne by the subdivider and shall be the actual cost of the inspection to the City.

170.08 MINIMUM IMPROVEMENTS. The improvements set forth below shall be considered the minimum improvements necessary to protect the public health, safety, and welfare.

(Code of Iowa, Sec. 364.1)

1. Streets and Alleys. All streets and alleys within the platted area which are dedicated for public use shall be brought to the grade approved by the Council after receiving the report and recommendations of the City Engineer.

2. Roadways. All roadways shall be surfaced with Portland cement concrete or with asphaltic concrete over a crushed stone base, as the Council may require.

3. Curb and Gutter. Curb and gutter shall be required on all streets. All curb and gutter shall be constructed to the grade approved by the Council after receiving the report and recommendations of the City Engineer. Newly constructed curbs and gutters shall comply with the Americans with Disabilities Accessibility Guidelines (ADAAG).

4. Sidewalks. Sidewalks may be required by the Council if they are considered necessary for the general welfare and safety of the community. Sidewalks shall be constructed to the grade approved by the Council after receiving the report and recommendations of the City Engineer.

5. Water Lines. Where a public water main is reasonably accessible, the subdivider shall connect with such water main and provide a water connection for each lot with service pipe installed to the property line in accordance with the City Water Department standards, procedures, and supervision.

A. Where a public sanitary sewer is reasonably accessible, the subdivider shall connect or provide for the connection with such sanitary sewer and shall provide within the subdivision the sanitary sewer system as required to make the sewer accessible to each lot in the subdivision. Sanitary sewers shall be stubbed into each lot. Sewer systems shall be approved by the Council and the State Department of Health and the construction subject to the supervision of the Public Works Director.

B. Where sanitary sewers are not available, other facilities, as approved by the Council and the State Department of Health, must be provided for the adequate disposal of sanitary wastes.

C. Adequate provisions shall be made for the disposal of storm waters, subject to the approval of the Council and to the supervision of the Public Works Director.
170.09  COMPLETION OF IMPROVEMENTS.  Before the Council shall approve the final plat, all of the foregoing improvements shall be constructed and accepted by formal resolution of the Council.  Before passage of said resolution of acceptance, the Public Works Director shall report that said improvements meet all City specifications and ordinances or other City requirements, and the agreements between subdivider and the City.

170.10  PERFORMANCE BOND.  The completion requirement may be waived in whole or in part if the subdivider will post a performance bond with the Council guaranteeing that improvements not completed will be constructed within a period of one year from final acceptance of the plat, but final acceptance of the plat will not constitute final acceptance by the City of any improvements to be constructed.  Improvements will be accepted only after their construction has been completed, and no public funds will be expended in the subdivision until such improvements have been completed and accepted by the City.

[The next page is 847]
170.11 MINIMUM STANDARDS. The following standards shall be considered the minimum standards necessary to protect the public health, safety, and general welfare.

1. Relation to Existing Streets.
   A. The arrangement, character, extent, width, grade, and location of all streets shall be considered in their relation to existing and planned streets, to topographic conditions, to public convenience and safety, and in their appropriate relation to the proposed uses of the land to be served by such streets.
   B. The arrangement of streets in a subdivision shall either provide for the continuation of appropriate projection of existing principal streets in surrounding areas or conform to a plat for the neighborhood approved by the Council to meet a particular situation where topographical or other conditions made continuance or conformance to existing streets impracticable.

2. Acreage Subdivisions.
   A. Where the plat submitted covers only a part of the subdivider’s plat, a sketch of the prospective future system of the unsubmitted part shall be furnished and the street system of the part submitted shall be considered in the light of adjustments in connection with the street system of the part not submitted.
   B. Where the parcel is subdivided into larger tracts than for building lots, such parcels shall be divided so as to allow for the opening of major streets and the ultimate extension of adjacent minor streets.
   C. Subdivisions showing unplatted strips or private streets controlling access to public ways will not receive approval.

3. Local Streets.
   A. Local streets shall be so planned as to discourage through traffic.
   B. Cul-de-sac streets are permitted where topography and other conditions justify their use. Such streets shall not be longer than 500 feet and shall terminate with a turnaround, having an outside roadway diameter of at least 80 feet and a street property line diameter of at least 100 feet. The right-of-way width of the straight portion of such streets shall be a minimum of 50 feet. The property line at the intersection of the turn-around and the straight portion of the street shall be rounded at a radius of not less than 20 feet.

4. Frontage Streets.
   A. Where a subdivision abuts or contains an existing or proposed arterial street, the Council may require marginal access streets, reverse frontage with screen planting contained in a non-access reservation along the rear property line, deep lots with rear service alleys, or such other treatment as may be necessary for adequate protection of residential properties and to afford separation of through and local traffic.
   B. Where a subdivision borders on or contains a railroad right-of-way or limited access highway right-of-way, the Council may require a street approximately parallel to and on each side of such right-of-way, at a distance suitable for the appropriate use of the intervening land, as for park purposes in
residential districts. Such distances shall also be determined with due regard for the requirements of approach grades and future grade separations.

5. Half-Streets. Half-streets shall be prohibited except where essential to the reasonable development of the subdivision in conformity with the other requirements of these regulations, and where the Council finds it will be practicable to require the dedication of the other half when the adjoining property is subdivided. Wherever a half-street is adjacent to a tract to be subdivided, the other half of the street shall be platted within such tract.

   A. Street jogs with centerline offsets of less than 125 feet shall be avoided.
   B. A tangent at least 100 feet long shall be introduced between reverse curves on arterial and collector streets.
   C. When connecting street lines deflect from each other at any one point by more than 10 degrees, they shall be connected by a curve with a radius adequate to insure a sight distance of not less than 200 feet for minor and collector streets, and of such greater radii as the Council shall determine for special cases.

7. Intersections.
   A. Insofar as is practical, acute angles between streets at their intersection are to be avoided.
   B. Streets shall be laid out so as to intersect as nearly as possible at right angles and no street shall intersect any other street at less than sixty (60) degrees.
   C. Property lines at street intersections shall be rounded with a radius of 10 feet, or of a greater radius where the Council may deem it necessary. The Council may permit comparable cutoffs or chords in place of rounded corners.

8. Street Names. Streets that are in alignment with others already existing and named shall bear the name of the existing streets. The proposed names of new streets shall not duplicate or sound similar to existing street names. Street names shall be subject to the approval of the Council.

9. Street Grades.
   A. Street grades, wherever feasible, shall not exceed five percent, with due allowance for reasonable vertical curves.
   B. No street grade shall be less than one-half of one percent.

10. Alleys.
    A. Alleys shall be provided in commercial and industrial districts, except that the Council may waive this requirement where other definite and assured provision is made for service access, such as off-street loading, unloading, and parking consistent with and adequate for the uses proposed.
    B. The width of an alley shall be 20 feet.
C. Alley intersections and sharp changes in alignment shall be avoided, but where necessary, corners shall be cut off sufficiently to permit safe vehicular movements.

D. Dead-end alleys shall be avoided where possible, but if unavoidable, shall be provided with adequate turnaround facilities at the dead end, as determined by the Council.

A. No block may be more than 1,320 feet or less than 500 feet in length between the centerlines of intersecting streets, except where, in the opinion of the Council, extraordinary conditions unquestionably justify a departure from these limits.

B. In blocks over 700 feet in length, the Council may require at or near the middle of the block a public way or easement of not less than 10 feet in width for use by pedestrians and/or as an easement for public utilities.

12. Lots.

A. The lot size, width, depth, shape and orientation shall be appropriate for the location of the subdivision and for the type of development and use contemplated.

B. Minimum lot dimensions and sizes are as follows:

1. Residential lots, where not served by public sewer, shall not be less than 80 feet wide or less than 10,000 square feet in area.

2. Depth and width of properties reserved or laid out for commercial and industrial purposes shall be adequate to provide for the off-street service and parking facilities required by the type of use and development contemplated.

3. Corner lots for residential use shall have an extra 10 feet of width to permit appropriate building setback from and orientation to both streets.

C. The subdividing of the land shall be such as to provide, by means of public street, each lot with satisfactory access to an existing public street.

D. Double frontage and reverse frontage lots shall be avoided except where essential to provide separation of residential development from traffic arteries or to overcome specific disadvantages of topography and orientation. A planting screen easement of at least 10 feet, and across which there shall be no right of access, shall be provided along the line of lots abutting such a traffic artery or other disadvantageous use.

E. Side lot lines shall be substantially at right angles to straight street lines or radial to curved street lines.

13. Building Lines. Building lines shall be shown on all lots within the platted area. The Council may require building lines in accordance with the needs of each subdivision.
   A. Easement across lots or centered on rear or side lot lines shall be provided for utilities where necessary and shall be at least 10 feet wide.
   B. Where a subdivision is traversed by a watercourse, drainage way, channel or stream, there shall be provided a storm water easement or drainage right-of-way conforming substantially with the lines of such watercourse, and further width for construction, or both, as will be adequate for the purpose.

15. Plat Markers. Markers shall be placed at all block corners, angle points, points of curves in streets, and all such intermediate points as shall be required by the Council. The markers shall be of such material, size and length as may be approved by the Council.

[The next page is 859]
170.12 PROCEDURES AND SUBMISSION REQUIREMENTS FOR PLATS. In obtaining final approval of a proposed subdivision by the Council, the subdivider and owner shall submit a plat in accordance with the requirements hereafter set forth and install improvements or provide a performance bond.

170.13 PRE-APPLICATION CONFERENCE. Whenever a subdivision located within the platting jurisdiction of the City is proposed, the owner and subdivider shall schedule a pre-application conference with the City Clerk. The conference should be attended by the City Clerk and such other City or utility representatives as is deemed desirable; and by the owner and said owner’s engineer and/or planner, as deemed desirable. The purpose of such conference shall be to acquaint the City with the proposed subdivision, and to acquaint the subdivider with the requirements, procedures, and any special problems relating to the proposed subdivision.

170.14 SKETCH PLAN REQUIRED. For the pre-application conference, the subdivider shall provide a map or sketch showing the location of the subdivision, the general location of any proposed streets and other improvements, and the general layout and arrangement of intended land uses, in relation to the surrounding area.

170.15 PRESENTATION TO COMMISSION OR COUNCIL. The subdivider may present the sketch plan to the Commission or Council for review, prior to incurring significant costs preparing the preliminary or final plat.

170.16 SUBDIVISION CLASSIFIED. Any proposed subdivision or resubdivision shall be classified as minor subdivision or a major subdivision.

1. Minor Subdivision. A minor subdivision means any subdivision that contains not more than four (4) lots fronting on an existing street and that does not require construction of any public improvements, and that does not adversely affect the remainder of the parcel.

2. Major Subdivision. A major subdivision means any subdivision that, in the opinion of the Council, does not for any reason meet the definition of a minor subdivision.

170.17 PLATS REQUIRED. In order to secure approval of a proposed subdivision, the owner and subdivider of any major subdivision shall comply with the requirements for a preliminary plat and the requirements for a final plat. The owner and subdivider of a minor subdivision or an auditor’s plat may elect to omit the submission of a preliminary plat.

(Code of Iowa, Sec. 354.6)

170.18 REQUIREMENTS OF PRELIMINARY PLAT. The subdivider shall prepare and file with the City Clerk four (4) copies of a preliminary plat of adequate scale and size showing the following:

1. Title, scale, north point and date.

2. Subdivision boundary lines, showing dimensions, bearing angles, and references to section, townships and range lines or corners.

3. Present and proposed streets, alleys and sidewalks, with their right-of-way, in or adjoining the subdivision, including dedicated widths, approximate gradients, types and widths of surfaces, curbs, and planting strips, and location of street lights.
4. Proposed layout of lots, showing numbers, dimensions, radii, chords and the square foot areas of lots that are not rectangular.

5. Building setback or front yard lines.

6. Parcels of land proposed to be dedicated or reserved for schools, parks, playgrounds, or other public, semi-public or community purposes.

7. Present and proposed easements, showing locations, widths, purposes and limitation.

8. Present and proposed utility systems, including sanitary and storm sewers, other drainage facilities, water lines, gas mains, electric utilities, and other facilities, with the size, capacity, invert elevation and location of each.

9. Proposed name of the subdivision, which shall not duplicate or resemble existing subdivision names in the County.

10. Names and addresses of the owner, subdivider, builder, and engineer, surveyor or architect who prepared the preliminary plat, and the engineer, surveyor or architect who will prepare the final plat.

11. Existing and proposed zoning of the proposed subdivision and adjoining property.

12. A general summary description of any protective covenants or private restrictions to be incorporated in the final plat.

13. Contours at vertical intervals of not more than two (2) feet if the general slope of the site is less than ten percent and at vertical intervals of not more than five (5) feet if the general slope is ten percent or greater, unless the City Council waives this requirement.

170.19 REFERRAL OF PRELIMINARY PLAT. The City Clerk shall forthwith refer two (2) copies of the preliminary plat to the City Engineer and (2) copies to the Council.

170.20 ACTION BY THE CITY ENGINEER. The City Engineer shall carefully examine said preliminary plat as to its compliance with Section 354.8 of the Code of Iowa and the laws and regulations of the City, the existing street system, and good engineering practices, and shall, as soon as possible, submit the City Engineer’s findings in duplicate to the Council, together with one copy of the plat received.

(Code of Iowa, Sec. 354.8)

170.21 ACTION BY THE COUNCIL. The Council shall, upon receiving the report of the City Engineer, as soon as possible, but not more than thirty (30) days thereafter, consider said report, negotiate with the subdivider on changes deemed advisable and the kind and extent of improvements to be made by the subdivider, and pass upon the preliminary plat as originally submitted or modified. If the Council does not act within thirty (30) days, the preliminary plat shall be deemed to be approved, provided, however, that the subdivider may agree to an extension of the time for a period not to exceed an additional sixty (60) days. It shall then set forth its recommendations in writing, whether of approval, modification, or disapproval.

1. In the event that substantial changes or modifications are made by the Council or disapproval of the plat, it shall give its reasons therefor and it may request and
cause the revised preliminary plat to be resubmitted in the same manner as the original plat.

2. If approved, the Council shall express its approval as “Conditional Approval” and state the conditions of such approval, if any.

3. The action of the Council shall be noted on two (2) copies of the preliminary plat, referenced and attached to any conditions determined. One copy shall be returned to the subdivider and the other copy retained by the Council.

4. The Conditional Approval by the Council shall not constitute final acceptance of the addition or subdivision by the City but an authorization to proceed with preparation of the final plat.

170.22 FINAL PLAT. The final plat shall conform substantially to the preliminary plat as approved, and, if desired by the subdivider, it may constitute only that portion of the approved preliminary plat which the subdivider proposes to record and develop at the time, provided, however, that such portion conforms to all requirements of these regulations.

170.23 REFERRAL OF FINAL PLAT. The subdivider shall, within twelve (12) months of the Conditional Approval of the preliminary plat by the Council, prepare and file four (4) copies of the final plat and other required documents with the City Clerk as hereinafter set forth, and upon the subdivider’s failure to do so within the time specified, the Conditional Approval of the preliminary plat shall be null and void unless an extension of times is applied for and granted by the Council. Upon receipt of the final plat and other required documents, the City Clerk shall transmit two (2) copies of the final plat to the Council for its recommendations and approval. Except for a final plat for a minor subdivision or an auditor’s plat as set forth herein, no final plat shall be considered by the Council until and unless a preliminary plat for the area included in the proposed final plat has been approved and has not expired and become void as set forth above. At its discretion the Council may refer the final plat to the City Engineer pursuant to the procedure established in 170.19.

170.24 REQUIREMENTS OF THE FINAL PLAT. The final plat shall conform to the requirements of Chapter 355, Code of Iowa, and shall be clearly and legibly drawn to a scale of not more than 100 feet to one inch with permanent ink on a reproducible tracing material. It shall show:

(Code of Iowa, Sec. 354.8 and 355.8)

1. The title under which the subdivision is to be recorded.

2. The linear dimensions in feet and decimals of a foot of the subdivision boundary, lot lines, streets and alleys. These should be exact and complete to include all distances, radii, arc, chords, points of tangency and central angles.

3. Street names and clear designations of public alleys. Streets that are continuations of present streets should bear the same name. If new names are needed, they should be distinctive. Street names may be required to conform to the City Plan.

4. Location, type, materials, and size of all monuments and markers including all U.S., County or other official bench marks.

5. The signature and acknowledgement of the subdivision land owner and the subdivision land owner’s spouse.
6. A sealed certification of the accuracy of the plat and that the plat conforms to Section 354.8 of the Code of Iowa by the professional engineer or land surveyor who drew the final plat.

170.25 FINAL PLAT ATTACHMENTS. The final plat shall have the following attached to it:

1. A correct description of the subdivision land.

2. A statement by the proprietors and their spouses, if any, that the plat is prepared with their free consent and in accordance with their desire, signed and acknowledged before an officer authorized to take the acknowledgments of deeds. The statement by the proprietors may also include a dedication to the public of all lands within the plat that are designated for streets, alleys, parks, open areas, school property, or other public use, if the dedication is approved by the Council.

3. A statement from the mortgage holders or lienholders, if any, that the plat is prepared with their free consent and in accordance with their desire, signed and acknowledged before an officer authorized to take the acknowledgment of deeds. An affidavit and bond as provided for in Section 354.12 of the Code of Iowa may be recorded in lieu of the consent of the mortgage or lienholder. When a mortgage or lienholder consents to the subdivision, a release of mortgage or lien shall be recorded for any areas conveyed to the City or dedicated to the public.

4. An opinion by an attorney-at-law who has examined the abstract of title of the land being platted. The opinion shall state the names of the proprietors and holders of mortgages, liens or other encumbrances on the land being platted and shall note the encumbrances, along with any bonds securing the encumbrances. Utility easements shall not be construed to be encumbrances for the purpose of this section.

5. A certificate of the County Treasurer that the land is free from certified taxes and certified special assessments or that the land is free from certified taxes and that the certified special assessments are secured by bond in compliance with Section 354.12 of the Code of Iowa.

6. A statement by the Auditor approving the name or title of the subdivision plat.

7. A resolution and certificate for approval by the Council and for signatures of the Mayor and Clerk.

8. Profiles, typical cross sections, and specifications of street improvements and utility systems, to show the location, size and grade. These should be shown on a 50-foot horizontal scale and a five-foot vertical scale with west or south at the left.

9. A certificate by the City Clerk or similar official that all required improvements and installations have been completed, or that a performance bond guaranteeing completion has been approved by the City Attorney and filed with the City Clerk, or that the Council has agreed that the City will provide the necessary improvements and installations and assess the costs against the subdivider or future property owners in the subdivision.

10. The encumbrance bond, if any, as specified in Section 354.12, Code of Iowa.

11. A certificate of dedication of streets and other public property.
170.26 **ACTION BY THE COUNCIL.** Upon receipt of the plat, but not more than 60 days following submission of the final plat to the City Clerk as stated in Section 170.23, the Council shall either approve or disapprove the final plat.

(Code of Iowa, Sec. 354.8)

1. In the event that said plat is disapproved by the Council, such disapproval shall be expressed in writing and shall point out wherein said proposed plat is objectionable.

2. In the event that said plat is found to be acceptable and in accordance with this chapter, the Council shall accept the same.

3. The passage of a resolution by the Council accepting the plat shall constitute final approval of the platting of the area shown on the final plat, but the subdivider or owner shall cause such plat to be recorded in the office of the County Recorder of Woodbury, County, Iowa, and shall file satisfactory evidence of such recording before the City shall recognize the plat as being in full force and effect.

170.27 **VARIANCES.** Where in the case of a particular proposed subdivision, it can be shown that strict compliance with the requirements of this chapter would result in extraordinary hardship to the subdivider, because of unusual topography or other conditions, the Council may vary, modify, or waive the requirements so that substantial justice may be done and the public interest secured. Provided, however, such variance, modification, or waiver will not have the effect of nullifying the intent and purpose of this chapter. Such variances and waivers may be granted only by the affirmative vote of three-fourths (3/4) of the members of the Council.

170.28 **CHAIN SUBDIVIDING.** No more than two building permits for each separate tract existing at the effective date of the ordinance codified in this chapter shall be issued unless the tract has been platted in accordance with this chapter; except that this provision shall not limit the number of building permits that may be issued for additions or improvements to a main or accessory building already legally located upon said tract.

170.29 **EXTRATERRITORIAL REVIEW AGREEMENT.** The City may negotiate an extraterritorial review agreement between the City and Woodbury County, for the standards and conditions applied by the City for review and approval of a subdivision as provided in Section 354.9 of the Code of Iowa. The City of Sloan shall apply the standards and conditions for review and approval of a subdivision in the extraterritorial review area as established in Section 170.04 of this chapter. The City may, by resolution, waive its right to review the subdivision or waive the requirements of any of its standards or conditions for approval of the subdivision in the extraterritorial area. Such resolution shall be certified and recorded with the plat. Procedures for certifying approval of subdivisions in the extraterritorial area of the City shall be the same as those established for other subdivisions with the City unless waived by the Council.
